SITOP PSU6200/1AC/24VDC/10A

SITOP PSU6200 24 V/10 A stabilized power supply input: 120 - 230 V AC (110 - 240 V DC) output: 24 V / 10 A DC with diagnostic interface

input		
type of the power supply network	1-phase AC or DC	
supply voltage at AC minimum rated value	120 240 V	
supply voltage at AC maximum rated value		
supply voltage at AC initial value	85 264 V	
supply voltage at AC full-scale value		
supply voltage at DC	110 240 V	
input voltage at DC	85 275 V	
wide range input	Yes	
overvoltage overload capability	300 V AC for 30 s	
buffering time for rated value of the output current in the event of power failure minimum	45 ms	
operating condition of the mains buffering	at Vin = 240 V	
line frequency	50/60 Hz	
line frequency initial value	47 63 Hz	
line frequency full-scale value		
input current		
 at rated input voltage 120 V 	2.2 A	
 at rated input voltage 240 V 	1.2 A	
current limitation of inrush current at 25 °C maximum	6 A	
fuse protection type	5 A	
fuse protection type in the feeder	Circuit breaker from 4 A characteristic C/6 A characteristic B to 10 A characteristic C or circuit breaker 3RV2011-1EA10 (setting 4 A) or 3RV2711-1ED10 (UL 489)	
output		
voltage curve at output	Controlled, isolated DC voltage	
number of outputs	1	
output voltage at DC rated value	24 V	
output voltage		
 at output 1 at DC rated value 	24 V	
output voltage adjustable	Yes; via potentiometer	
adjustable output voltage initial value	24 V	
adjustable output voltage full-scale value	28 V; max. 240 W (288 W up to 45°C)	
relative overall tolerance of the voltage	3 %	
relative control precision of the output voltage		
 on slow fluctuation of input voltage 	0.1 %	
 on slow fluctuation of ohm loading 	0.1 %	
residual ripple		
• maximum	30 mV	
• typical	20 mV	
voltage peak		

• maximum	30 mV			
• typical	20 mV			
display version for normal operation	Green LED for 24 V OK			
type of signal at output	Electronic contact (NO contact, contact rating 30 V DC/0.1 A) for DC O.K. or diagnostic interface			
behavior of the output voltage when switching on	Overshoot of Vout < 2 %			
response delay maximum	0.5 s			
voltage increase time of the output voltage				
• typical	200 ms			
output current				
 rated value 	10 A			
 rated range 	0 10 A; 12 A up to +45°C; +60 +70 °C: Derating 3%/K			
supplied active power typical	240 W			
short-term overload current				
 on short-circuiting during the start-up typical 	12 A			
 at short-circuit during operation typical 	12 A			
parallel switching of outputs	can be set with DIP switch			
bridging of equipment	Yes; switchable characteristic			
number of parallel-switched equipment resources for increasing the power	2			
efficiency in percent	92.8 %			
power loss [W]				
 at rated output voltage for rated value of the output current typical 	18 W			
 during no-load operation maximum 	2.2 W			
closed-loop control				
relative control precision of the output voltage at load step of	2 %			
resistive load 10/90/10 % typical				
setting time	0			
load step 10 to 90% typical	2 ms			
 load step 90 to 10% typical 	2 ms			
• maximum	3 ms			
protection and monitoring				
protection and monitoring design of the overvoltage protection	< 32 V			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof	< 32 V Yes			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection	< 32 V Yes Shutdown and periodic restart attempts			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical	< 32 V Yes			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability	< 32 V Yes Shutdown and periodic restart attempts 12 A			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation	< 32 V Yes Shutdown and periodic restart attempts			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety	< 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output	< 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for mains harmonics limitation • for interference immunity	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus 			
protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection • typical overcurrent overload capability • in normal operation safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP standard • for emitted interference • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	 < 32 V Yes Shutdown and periodic restart attempts 12 A overload capability 150 % lout rated up to 5 s/min Yes Safety extra low output voltage Vout according to EN 60950-1 Class I 3.5 mA IP20 EN 55022 Class B EN 61000-3-2 EN 61000-6-2 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus (CSA C22.2 No. 60950-1, UL 60950-1) Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus

Subject to change without notice © Copyright Siemens that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement - and continuously maintain - a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
