## DATASHEET - LN2-250-I

Switch-disconnector, 3 p, 250A, frame size 2

| Part no.    | LN2-250-I |
|-------------|-----------|
| Catalog No. | 112004    |

## **Delivery program**

| Product range  |             |      | Switch-disconnectors   |
|--|-------------|------|--|
| Protective function                                  |             |      | Disconnectors/main switches  |
| Standard/Approval                                    |             |      | IEC  |
| Installation type                                    |             |      | Fixed  |

| Description  |             |      | Main switch characteristics including positive drive to IEC/EN 60204 and VDE 0113.<br>Isolating characteristics to IEC/EN 60947-3 and VDE 0660.<br>Busbar tag shroud to VDE 0160 Part 100. |
| Number of poles                                      |             |      | 3 pole   |
| Standard equipment                                   |             |      | Screw connection   |
| Switch positions                                     |             |      | I, +, 0  |
| Rated current = rated uninterrupted current          | $I_n = I_u$ | Α    | 250  |
| Short-circuit protection max. fuse gL-characteristic |             | A gL | 250  |

## **Technical data**

#### Switch-disconnectors

| Rated surge voltage invariability           | U <sub>imp</sub> |         |                     |
|---|------------------|---------|---------------------|
| Main contacts                               |                  | V       | 8000                |
| Auxiliary contacts                          |                  | V       | 6000                |
| Rated operational voltage                   | Ue               | V AC    | 690                 |
| Rated operating frequency                   | f                | Hz      | 50/60               |
| Rated current = rated uninterrupted current | $I_n = I_u$      | Α       | 250                 |
| Overvoltage category/pollution degree       |                  |         | III/3               |
| Rated insulation voltage                    | Ui               | V       | 690                 |
| Use in unearthed supply systems             |                  | V       | ≦ 690               |
| Rated short-circuit making capacity         |                  |         |                     |
| 690 V 50/60 H                               | lc               | kA      | 5.5                 |
| Rated short-time withstand current          |                  |         |                     |
| t = 0.3 s                                   | I <sub>cw</sub>  | kA      | 3.5                 |
| t = 1 s                                     | I <sub>cw</sub>  | kA      | 3.5                 |
| Rated conditional short-circuit current     |                  |         |                     |
| With back-up fuse                           |                  | A gG/gL | PN2(N2)-160250: 250 |
| 400 415 V                                   |                  | kA      | 100                 |
| 690 V                                       |                  | kA      | 80                  |
| With downstream fuse                        |                  | A gG/gL | PN2(N2)-160250: 250 |
| 400 415 V                                   |                  | kA      | 100                 |
| 690 V                                       |                  | kA      | 80                  |
| Rated making and breaking capacity          |                  |         |                     |
| Rated operational current                   | le               | А       |                     |
| 415 V                                       | le               | Α       | 250                 |
| 690 V                                       | le               | А       | 250                 |
| 415 V                                       | le               | А       | 250                 |
| 690 V                                       | le               | А       | 250                 |
| Lifespan, mechanical                        | Operations       |         | 20000               |
| Max. operating frequency                    |                  | Ops/h   | 120                 |
| Lifespan, electrical                        |                  |         |                     |
| 400 V 50/60 Hz                              | Operations       |         | 10000               |
| 415 V 50/60 Hz                              | Operations       |         | 10000               |
|   |                  |         |                     |

| 690 V 50/60 Hz  | Operations |                 | 7500                                 |
|---|------------|-----------------|--------------------------------------|
| 400 V 50/60 Hz  | Operations |                 | 7500                                 |
|   |            |                 |                                      |
| 415 V 50/60 Hz  | Operations |                 | 7500                                 |
| 690 V 50/60 Hz  | Operations |                 | 5000                                 |
| Total break time at short-circuit Terminal capacity       |            | ms              | < 10                                 |

# Design verification as per IEC/EN 61439

| Technical data for design verification                                     |                  |   |  |
|--|------------------|---|--|
| Rated operational current for specified heat dissipation                   | In               | А | 250  |
| Equipment heat dissipation, current-dependent                              | P <sub>vid</sub> | W | 48   |
| IEC/EN 61439 design verification   |                  |   |  |
| 10.2 Strength of materials and parts                                       |                  |   |  |
| 10.2.2 Corrosion resistance  |                  |   | Meets the product standard's requirements. |
| 10.2.3.1 Verification of thermal stability of enclosures                   |                  |   | Meets the product standard's requirements. |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat |                  |   | Meets the product standard's requirements. |

| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects | Meets the product standard's requirements.   |
|--|--|
| 10.2.4 Resistance to ultra-violet (UV) radiation   | Meets the product standard's requirements.   |
| 10.2.5 Lifting   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.6 Mechanical impact   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.2.7 Inscriptions  | Meets the product standard's requirements.   |
| 10.3 Degree of protection of ASSEMBLIES  | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.4 Clearances and creepage distances   | Meets the product standard's requirements.   |
| 10.5 Protection against electric shock   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.6 Incorporation of switching devices and components   | Does not apply, since the entire switchgear needs to be evaluated.   |
| 10.7 Internal electrical circuits and connections  | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors   | Is the panel builder's responsibility.   |
| 10.9 Insulation properties   |  |
| 10.9.2 Power-frequency electric strength   | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage   | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material   | Is the panel builder's responsibility.   |
| 10.10 Temperature rise   | The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |
| 10.11 Short-circuit rating   | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.12 Electromagnetic compatibility  | Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |
| 10.13 Mechanical function  | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |

### **Technical data ETIM 6.0**

Low-voltage industrial components (EG000017) / Switch disconnector (EC000216)
